

**Intern Test Technician — Lake Turkana, Kenya**

**November 2018**

**We believe in the sustainable production of clean water.**

**DO YOU?**

Desolenator is a clean-technology start-up developing a patented technology that uses just solar power to purify water from any source.

We will be testing the performance of our first products over the coming year, and you can help us design our best products yet. We are looking for a “field test technician” to join our passionate team testing our units during field trials in Kenya in early 2019.

This role will initially be fixed to 3 months, with the potential to join full time or on a project basis in the future. After training in the UK, these initial 3 months will be based full-time at our trial site in Lake Turkana, Kenya.

**Required skills & experience:**

Passion for understanding how things work.

Has previous “hands-on” technical experience.

Thrives on working under adverse conditions in the field.

Logical & detailed thinker.

Takes initiative and leadership over tasks.

Is entrepreneurial and is a self-starter.

Able to work independently and in teams.

Determination to tackle the global water crisis & looking to make a positive impact on the world.
