

## Intern Test Technician

Various Start Dates/ Summer Internships

We believe in the sustainable production of clean water.

DO YOU?

Desolenator is a clean-technology start-up developing a patented technology that uses just solar power to purify water from any source.

We will be testing the performance of our first products over the coming year, and you can help us design our best products yet. We are looking for ‘field test technician’ to join our passionate team testing our units both at our lab in Maastricht, The Netherlands and during various field trials around the globe.

Internships can be arranged to suit the applicant’s schedule and the available workstreams/ development streams. Generally you should be available for no less than 2 months and should be able and willing to spend at least part of your time at our lab.

### You should:

Have a passion for understanding how things work.

Have previous “hands-on” technical experience.

Thrive on working under adverse conditions in the field.

Be a logical & detailed thinker.

Take initiative and leadership over tasks.

Be entrepreneurial and a self-starter.

Be able to work independently and in teams.

Have determination to tackle the global water crisis & looking to make a positive impact on the world.

In addition, you should be undergoing or have recently completed some form of post-secondary education in engineering, chemistry, renewables or equivalent.
